Title: John Smith’s 2nd Voyage Exploring the Chesapeake Bay

Developed by: Sari J. Bennett and Patricia King Robeson (Maryland Geographic Alliance)

Grade Level: 4/5

Duration: 2 class periods

VSC:
Geography Grade 4:
3.A.1 Use geographic tools to locate places and describe the human and physical characteristics of those places
   c. Use photographs, maps, charts, graphs and atlases to describe geographic characteristics of Maryland and the United States

Geography Grade 5:
3.A.1 Use geographic tools to locate places and describe human and physical characteristics in colonial America
   c. Use photographs, maps, and drawings to describe geographic characteristics

Social Studies Skills and Processes
6.D.1 Identify primary and secondary sources of information that relate to the topic/situation/problem being studied
   c. Locate and gather data and information from appropriate non-print sources, such as music, artifacts, charts, maps, graphs, photographs, video clips, illustrations, paintings, political cartoons, interviews, and oral histories

Objectives:
Students will be able to:
• interpret a primary source, John Smith’s map and excerpts from his journal.
• identify places on a map that show John Smith’s route.
• identify geographic characteristics seen by John Smith on his second voyage of the Chesapeake Bay

Vocabulary: Names on the left are taken from Smith’s map. Modern names are on the right.
flu river
Powhatan flu James River
Bolus flu Patapsco River
Poynt comfort Point Comfort
Patawomeck flu Potomac River
Pawtuxunt flu Patuxent River
Tockwogh flu Sasfrass River
Sasquesahanough flu Susquehanna River
Rickards cliffs Calvert Cliffs
Symths fales Conowingo Dam
Gunters Harbour North East River
Materials:
Teacher:
“A Powhatan Village” make a transparency

Students:
“Virginia” John Smith’s Map - 1 for each group of four students. Have students construct maps before lesson begins or use “Chesapeake Bay in John Smith’s Time” (National Geographic Society)
“John Smith’s Second Voyage up the Chesapeake Bay Journal Excerpts” - 1 set for each group of 4 students
“River and Place Names” - 1 for each group of 4 students
“Match Photographs to Journal Entries” - 1 for each group of 4 students or make a transparency
“What Do You Know About Smith’s Second Voyage?” - 1 for each student

Teacher Background:
In the summer of 1608, John Smith made two voyages from Jamestown to explore the Chesapeake Bay and its tributaries. Smith documented the geographic characteristics of the region and his encounters with the Native People. He wrote The Generall Historie of Virginia, New England & the Summer Isles and made a map of the Chesapeake Bay region using this information.

Students must understand “geographic characteristics” to complete the activities in this lesson. Each place has distinctive characteristics that distinguishes it from other places. This lesson contains information about the geographic characteristics of the Chesapeake Bay in 1608. Geographic characteristics are divided into two categories: physical characteristics and human characteristics.

Physical characteristics describe the natural environment of the place. They include:
- physical features - landforms and bodies of waters
- weather and climate - the short term conditions of the atmosphere determined by variables such as temperature, wind, moisture, and pressure. Climate is the average temperature and rainfall for a particular place over hundreds of years.
- soil - the thin layer of material on the Earth’s surface. Sand, silt, and clay are the basic types of soil.
- minerals - naturally occurring, nonliving solids with a characteristic crystal, structure and definite chemical makeup.
- vegetation- four types: forest, grassland, tundra and desert. Climate affects the vegetation of a place.
- animal life - all the large and small animals that live on Earth.

Human characteristics describe the people of the place (past and present), their languages, religions, economic activities, political systems, population distribution, and modifications of the environment. Human characteristics include:
- human-made features - modifications people have made to land (for example: buildings, bridges, tunnels, railroad tracks, dams, monuments, piers, cultivated
land

- language - a way of communication with words, symbols, signs, or gestures that are used and understood by a group of people.
- religion - a set of beliefs and practices relating to a god or gods and generally agreed upon by a number of people.
- political system - how people develop and change structures of power, authority and government.
- economic activities - how people make a living in a place
- population distribution - the pattern of the number of people who live in a place.

Lesson Development:

Review/Motivation:

1. Show students “A Powhatan Village” transparency and ask them to describe what they see and what is happening in the photographs. Have students identify the geographic characteristics they see in the photographs. (vegetation - trees, forest, plants; animal life - fish; human-made features - garden, shelter, dancing faces poles) Explain that this is a re-created village similar to the one John Smith and his men saw upon their arrival in Jamestown. All along the Chesapeake Bay region Native Peoples lived in villages that often included shelters, gardens, storehouses, and a dance circle used for religious and social ceremonies. Rivers, streams, forests, and agricultural fields supplied food and resources for making tools, clothing, weapons, and other basic items. Native Peoples used the natural environment to provide the necessities of life.

2. Divide students into groups of four and give each group a copy of “Virginia” (John Smith’s Map). Tell students that during the summer of 1608, John Smith made two voyages from Jamestown to explore the Chesapeake Bay. The Virginia Company instructed Smith and his crew to find minerals, explore the region and look for a “Northwest Passage” to the Pacific Ocean. Explain to students that they will be learning about John Smith’s second voyage to explore the Chesapeake Bay. Have students look at the map and find the square boxes containing numbers. These boxes show the route he explored on his second voyage. Ask, “Why didn’t Smith find the Northwest Passage? (Smith was exploring Chesapeake Bay which is a small part of the Atlantic ocean that is partly surrounded by land.)

3. Give each group of students the handout “John Smith’s Second Voyage up the Chesapeake Bay Journal Excerpts.” Tell them to read and discuss the information and to find the letter on the map that identifies the location of places he visited. Letters for the first voyage are found in circles.

Assessment:
1. Give each student a copy of “What Do You Know About Smith’s 2nd Voyage?” Explain that John Smith’s map and journal provided useful information about geographic characteristics of the Chesapeake Bay. Tell them to use his map and journal information from his second voyage journal to write a paragraph that explains how Smith saw the Native Peoples using the geographic characteristics for their life necessities.

2. Discuss answers:
   1 - lakes 6 - prairie dogs
   2 - snow 7 - cacti
   3 - manufacturing 8 - Navajo
   4 - churches 9. blizzards
   5 - village

3. Have students look at the photographs again discuss how Native Peoples used the natural environment to provide the necessities of life.

Conclusion:
1. Give each group “River and Place Names” and “Match Photographs to Journal Entries” or make a transparency and display it. Tell students to highlite the following dates on the “John Smith’s Second Voyage up the Chesapeake Bay - July 24, July 25-26, July 28, July 29, August 1, August 3 - 4, August 5 - 6, August 7, August 9, and August 19 - 31. Have students reread these entries and match them to one of the photographs.

2. Discuss answers and photographs with the students.
   A - July 28 - Patawomeck flu - Potomac River
   B - August - 5 - 6 - trade for furs
   C - July 24 - Powhatan flu - James River
   D - August 19 - 31 - places a cross near Mahaskahod village
   E - August 9 - crosses Bay
   F - August 7 - calling upon the sun god
   G - August 3 - 4 - searches for minerals
   H - July 25 - 26 - Kecoughtan village
   I - August 1 - brass and furs
   J - July 29 - Bolus flu - Patapsco River
John Smith’s Second Voyage up the Chesapeake Bay

Read and discuss the information and find the letter on the map that identifies the location of places Smith and his crew visited. Letters for second voyage are found in squares.

John Smith kept a detailed journal of his voyages on the Chesapeake Bay. Below are excerpts taken from an interpretation of his writing by Edward Wright Haile, Jamestown Narratives. Some places listed are not found on the Smith’s Map of the Chesapeake Bay. The places identified on his map are bolded and in italics. Look only for these places on Smith’s map.

July 24, 1608
John Smith and his crew leave Jamestowne _____ and sail down the Powhatan flu. ___

July 25 - 26, 1608
Winds from the east and northeast make sailing north very difficult. Smith and his crew stay at the Kecoughtan village. ______ The Kecoughtans are convinced that Smith is heading north to assault their enemies, the Massawomecks.

July 27, 1608
Winds are from the west, and Smith heads up the Bay to Stingray Isle ______ near the mouth of the Toppahancock flu.

July 28, 1608
Crosses the mouth of Patawomeck flu ______ and Pawtuxunt flu. ______

July 29, 1608
Brisk winds from the south make it possible to reach Bodkin's Point at the mouth of the Bolus flu. ______

July 30, 1608
Explores to the northeast and finds that the Bay divides into four: the Tockwogh flu, Elk flu, Gunters Harbour and Sasquesahanough flu.

July 31, 1608
Walks six miles up Gunters Harbour _____ to where it divides into two tributaries and places a cross to claim the head of the Bay for England. Discovers true source of the Bay to be the Sasquesahanough flu. _____ Meets with Massawomecks and trades fish, venison, bear meat, bearskins, bows, arrows, and warclubs.
August 1, 1608
Cliffs make sailing up the Tockwogh flu difficult and winds are unreliable. Comes to a **Tockwogh village** _____ and observes that they have iron cutting tools and brass. Tools and brass came from Sasquesahanough living above the falls of the Sasquesahanough flu. Smith asks two Tockwoghs who speak Sasquesahanough to join them.

August 2, 1608
Sails down Tockwogh flu to the mouth of the Sasquesahanough flu. Sails up the flu to **Smyths fales** _____ and plants a cross. Two Tockwoghs travel over land for 20 miles to **Sasquesahanough village** _____ to persuade their leader to come and meet with Smith.

August 3 - 4, 1608
Waiting for the Tockwoghs to return, Smith sails down Sasquesahanough flu, passes Gunters Harbour and sails farther east to explore the Elk River. Walks 8 miles searching for minerals and plants another cross near **Pergyns mount** ____.

August 5 - 6, 1608
Sails back to Smyths fales and waits for the two Tockwoghs to return from the Sasquesahanough's village. Two Tockwoghs return with 60 Sasquesahanough and canoes containing presents and trading goods: furs, venison, tobacco pipes, baskets, bows and arrows. Five Sasquesahanough leaders come aboard Smith's barge. Sail to Tockwogh village where feasting takes place.

August 7, 1608
Smith and his crew pray morning prayers and chant Old Testament psalms. Sasquesahanough reciprocate with a song of their own calling upon the sun god to bless Smith. Smith receives many items and is made their “governor” in exchange for his protection against the Massawomeeks.

August 8, 1608
Leaves the Tockwogh village and heads down the Bay where flood tides slow the barge.

August 9, 1608
Sails east near **Bornes poynt** . _____ Crosses the Bay and reaches the mouth of the Pawtuxent flu.

August 10 - 11, 1608
Along the eastern shore of the Pawtuxent flu they see two villages and establish trade
and friendship with the **Pawtuxunts**. Smith takes a Pawtuxunt guide on board and sails along the eastern shore of the flu for ten miles. They see a series of villages.

**August 12, 1608**
Trades and feasts with the chief of the **Acquintanacsuck village** and then return the Pawtuxunt guide to his village.

**August 13 - 17, 1608**
Weather permits sailing down the Pawtuxunt flu. Sails across the mouth of the Patawomeck flu to the Toppahanock flu. Explores the Toppahannock flu learning about the people, their politics and feasting.

**August 18, 1608**
Continues on the Toppahanock flu along the southern shore to avoid hostile encounters with the Rappahannocks. Spends the night on the northern shore of the Toppahanock flu at the **Pissaseck village**.

**August 19 - 31, 1608**
Continues to explore the Toppahanock flu and places a cross near the **Mahaskahod village** before sailing down the Toppahanock flu.

**September 1 - 7, 1608**
Explores the **Payankatank flu**. Begins long voyage back to Jamestowne. Northwesterly winds against them and lack of a breeze makes the trip difficult.
Match Photographs to Journal Entries

A. Potomac River
C. James River
E. Chesapeake Bay

B. Photograph of a Native American dwelling
D. Cross symbol
F. Photograph of a Native American ceremonial site

G. Stones

H. Sketch of Native American dwellings

I. Photograph of a Native American dwelling
J. Patapsco River Mouth
A Powhatan Village
River and Place Names

Names on the left are taken from Smith’s map. Modern names are on the right.

What Do You Know About Smith’s Second Voyage?

Use what you know and have learned about Smith’s second voyage and the Chesapeake Bay region to find and circle the **incorrect response**.

1. John Smith saw the following physical features:
   - rivers
   - lakes
   - bay
   - waterfall

2. Smith and his crew experienced the following weather:
   - rain
   - snow
   - wind
   - sun

3. Economic activities that existed in the 1608 in the Chesapeake Bay region included:
   - fishing
   - trading
   - hunting
   - manufacturing

4. Human-made features that Smith and his crew saw were:
   - shelters
   - gardens
   - churches
   - dance poles

5. Other physical features seen by Smith and his crew included:
   - island
   - mouth of river
   - harbor
   - village

6. Animal life that Smith and his crew might have seen:
   - prairie dogs
   - bears
   - stingray
   - deer

7. Vegetation that Smith and his crew saw:
   - trees
   - cacti
   - corn plants
   - marsh grasses

8. Native Peoples Smith and his crew encountered on their journey:
   - Navajo
   - Powhatan
   - Patuxunts
   - Kecoughtans

9 - 10. John Smith’s map and journal provided useful information about geographic characteristics of the Chesapeake Bay. Use his map and journal information from his second voyage journal to write a paragraph that explains how Smith saw the Native Peoples using the geographic characteristics for their life necessities.
